LOGO VARIATIONS

Thanks for not editing, changing, distorting, recoloring, or re-configuring the logo.

Preferred Logo Usage

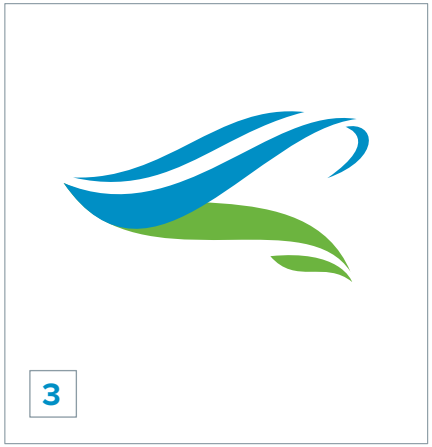
These branding guidelines will help you determine the best way to use our logo(s). The USA-based and UK-based logos have very similar, but different tag lines. Every effort should be made to keep the tagline and the logo together. However, the tagline can be removed from the logo **IF** the tagline appears somewhere on the media that the logo is being displayed on. Thanks for not editing, changing, distorting, recoloring, or re-configuring the logo.

1: US Primary Logotype w/tagline (preferred) - Use logo whenever possible with the tagline.

2: US Primary Logotype no tagline (acceptable) - Use of logo without tagline permitted when tagline is too small to be legible.

3: Glyph - Use in UI with limited space

4: US Horizontal Logotype - The Filta logo's glyph should remain in its standard position as often as possible. However, if media restrictions make readability or layout difficult, the horizontal logo may be used.



LOGO COLORS

Thanks for not editing, changing, distorting, recoloring, or re-configuring the logo.

Filta Blue & Green

are the primary colors used most often.

White

is used on darker backgrounds or photos where the preferred logo won't work.

Spacing Considerations

Keep at least a 1/2 X worth of space between the Logotype and other elements; however, 1 X would be ideal.

"Clear Zone"

This diagram is precise but we think your best approximation is just fine.

TYPEOGRAPHY (FONTS)

The font family primarily used for Filta are “Proxima Nova” (found on fonts.google.com) and “Proxima Nova Condensed” (found on fonts.adobe.com). Shown below are examples of how the to use the different styles (bold, italic, regular) as well as how color should be applied to the font. Use of the font at sizes shown below is preferred, but these sizes can be adjusted to accommodate different layouts.

HEADLINE FONT (Preferred): PROXIMA NOVA; BOLD+, UPPER CASE, 15+ Pt., “Filta Blue”

HEADLINE FONT (Acceptable): PROXIMA NOVA; BOLD+, UPPER CASE, 15+ Pt., “Filta Green”

Sub-Headline Font: Proxima Nova; Bold+, 10+ Pt., “Dark Blue”

Body copy is typeset in Proxima Nova (regular), 9 pt+, “Dark Cool Gray”. Body copy is typeset in Proxima Nova (regular), 9 pt+, “Dark Cool Gray”. 1: Primary Logotype: Used most often, but the other variations are accepted.

2: Logotype Alternate: White border with shadow to be used when placed on an image or colored background.

3: Glyph & Glyph white knockout: All Filta service logos have their own unique icon. They have been designed & intended to, at times, stand as individual graphic elements. They may not be rotated or be colored differently. They can also be used with their respective taglines.

4: Logotype vertical variation: There are no vertical file versions of the services logos; however, if media restrictctions make readability or layout difficult, the icon can be stacked above the type treatment and scaled within and acceptable range (see above).

5: Logotype white knockout: The Logotype or icon can sit on either Filta's brand colors, its unique service color, or photos where the preferred logo won't work.
